

Mental health Services in Germany at the edge of a new financing and funding system: Interests – Opportunities – Threats – Experiences – Perspectives

Ladies and gentlemen,
dear colleagues,

We would like to welcome you to our conference „Mental health Services in Germany at the edge of a new financing and funding system: Interests – Opportunities – Threats – Experiences – Perspectives“, organized by the association Forum für Gesundheitswirtschaft e.V. in cooperation with ver.di, the APK, the ZfP Südwürttemberg, the Pfalzlinikum and the Landeskrankenhaus.

The conference tries to bridging the gap between classical economical questions and conceptional and a range of problems and solutions in mental health. In 2013 the funding system for the mental health system in Germany will change completely. Therefore the conference tries to identify the economical, the social and public and the professional needs for am modern funding system. One focus of the conference will be the development of new forms of mental health services. The experts will also focus on topics like human ressource management, the improving of new service and providing strategies and of course of new modells for funding the needs. Last but not least, the conference will cover topics like quality improvement and the evaluation of outcome. The intended exchange between experts and the involved would like to give an impulse for the upcoming discussions about the redesign of the legal basis on the financing of the mental health infrastructure.

Our objective is to create a dialogue platform for stakeholders of the (mental) health care industry. At the same time it is about building a bridge between science and praxis and the effective use of experience and skills to solve current questions and problems. We would like to make our contribution to turn the companies of the health care industry into active carriers of initiatives and activities of the health care industry.

We are happy to welcome you to our conference on the 18. and 19. february 2010.

Kind regards of the initiators,

Prof. Dr. med. Peter Kruckenberg
Peter Brückner-Bozetti
Paul Bomke
Wolfgang Rieger

Simone Schweizer
Niko Stumpfögger
Enriqueta Fobbe
Michael Krömker
